OBJECTIVE

Computer Science and Engineering student with a strong foundation in full-stack web development, with hands-on experience in Node.js, JavaScript, Python, Flask, REST APIs, and MySQL. Experienced in developing responsive web applications, integrating backend services, and working with databases. Eager to contribute to real-world software solutions while continuously expanding technical skills in a collaborative development environment.

EDUCATION

Rajarajeswari College of Engineering

Bachelor of Engineering (B.E.) – Computer Science and Engineering

CGPA: 8.64/10

Bengaluru, India

Sept 2023 – June 2027

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Node.js

Backend: Flask, REST APIs

Programming Languages: Python, Java (Basics)

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code, Netlify, Render

Core Concepts: Object-Oriented Programming (OOP) (Basic), Data Structures (Basic), API Integration

INTERNSHIP EXPERIENCE

Industrial Mentors

Full Stack Web Development Intern / 2025

- Developed responsive web applications using HTML, CSS, and JavaScript with backend technologies and MySQL database integration.
- Gained practical experience in full-stack development workflows, application functionality, debugging, and database connectivity.
- Worked with frontend and backend components while understanding application flow, data handling, and database integration.

PROJECTS

Sri Kaveri Ice Plant – Commercial Website

React.js, TypeScript, HTML, CSS, Netlify

- Designed and developed a responsive commercial website for an industrial client using React.js and TypeScript, featuring reusable components and structured product sections.
- Integrated WhatsApp enquiry functionality and deployed the website on Netlify for public access.

Music Player Web Application

HTML, CSS, JavaScript, HTML5 Audio API

- Developed a responsive web-based music player with interactive playback controls, playlist functionality, and dynamic song handling.
- Implemented play/pause, next/previous track navigation, progress seeking, volume control, and automatic next-song playback using JavaScript and the HTML5 Audio API.

AI-Powered Resume Analyzer

Python, Flask, Gemini API, HTML, CSS, JavaScript

- Built an AI-powered resume analysis web application that evaluates resumes using ATS-based scoring and provides AI-generated improvement suggestions.
- Integrated REST APIs for intelligent resume analysis and feedback generation through the Flask backend.

Fake & Real Face Detection Web App

Python, HTML, CSS, JavaScript

- Developed a machine learning web application to classify fake and real faces using image preprocessing and deep learning models.
- Implemented image processing and real-time prediction workflows to generate classification results.
